***Transitional After Final Practice***

1. Since this application is eligible for the transitional procedure of 37 CFR 1.129(a), and the fee set forth in 37 CFR 1.17(r) has been timely paid, the finality of the previous Office action is hereby withdrawn pursuant to 37 CFR 1.129(a).

**DETAILED ACTION**

***Response to Arguments***

2. Applicant's arguments with respect to claims 2, 7-14, 20, 24-36 and 39-55 have been considered but are moot in view of the new ground(s) of rejection.

***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 2, 7-14, 20, 24-36 and 39-55 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 39, 41 and 55 are directed to electronic program guide (EPG) and fail to fall within a statutory category of invention. It is directed to the program itself, not a process occurring as a result of executing the program, a machine programmed to operate in accordance with program nor a manufacture structurally and functionally interconnected with the program in a manner which enables the program to act as a computer component and realize its functionality. It's also clearly not directed to a composition of matter. Therefore, it's non-statutory under USC 101.

Claims 2, 7-14, 20, 24-36, 40, 42-46 dependent on Claims 39 and 41 are also non-statutory.

Claims 47 and 54 are also non-statutory since the method claims are not tied to a statutory subject matters such as an apparatus or a computing device; therefore, non-statutory.

Art Unit: 2426

Claims 48-53 dependent on Claim 47 are also non-statutory.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 54 and 55 are rejected under 35 U.S.C. 102(b) as being anticipated by Lajoie et al (US 2005/0015804).

Regarding Claims 54 and 55, Lajoie discloses an EPG and a method of presenting an electronic programming guide (EPG) comprising:

displaying a celled grid having a first data set on a vertical axis and a second data set on a horizontal axis, wherein a cell at an intersection of the first data set and the second data set displays a title for available content (FIG.16); and

other titles to be scrolled vertically or horizontally to the fixed location of the window to display associated information, such that titles associated with the first data set move into an adjacent row when scrolling vertically and titles associated with the second data set move into an adjacent column when scrolling horizontally (FIG.16, element 394; scrolled title move into focus window vertically or horizontally).
